

NEW! Portable Car Jump Starter and Power Bank

Dead battery? No Problem!

Diamond's GoBox - A Portable Car Jump Starter and Power Bank is a multi-functional portable power source. This easy-to-use booster gives you peace of mind when you are on the road. Plus GoBox has the added convenience of being able to power 12 volt accessories - like your portable air pump. Can be used as a portable flash light/ emergency flasher with three extra bright LED lights built in. Plus, charge your mobile electronics: mobile phones, portable media players, tablets, notebooks, laptops, etc.

Includes:

- Power Bank
- Jump Starter Booster Cables
- Home Plug-In AC Charger
- 12 Volt Charger
- Laptop Interface
- USB Multi Cable
- Carrying Case

Easy-to-use

1. Connect the booster clamps
2. Turn on the GoBox booster
3. Start the vehicle
4. Remove clamps

8 Reasons Why Every Home Should Have a GoBox:

1. This multifunction booster will start your Vehicle, RV, Boat or ATV instantly (Approx 10 to 20 starts in one charge). Will start all gas and diesel engines.
2. GoBox is the smallest, lightest weight booster with 600 Amps and 27,600 MAH which allows for more battery starts and will hold a charge longer. Extremely compact, it is easy to store in your home, car, RV, or boat.
3. Diamond's GoBox delivers instant cold crank power when you need it and has a fast rechargeable long life battery.
4. Feel safer on the road. You can depend on GoBox to start your car, even in remote locations. Plus, you will not be limited by booster cable lengths.
5. Easy-to-see low power red LED light will come on in the control panel reminding you to recharge your multifunction jump starter from your vehicle power accessory outlet or home AC. When the multifunction booster is fully charged the green LED light on the control panel will come on.
6. You can't over charge or under charge it, the rechargeable battery has no 'memory'.
7. With three super bright LED lights built into GoBox you can use the booster as a flashlight, plus it lets you see under the hood to connect the booster to the battery and start the car in the dark. The LED lights also have an emergency flash setting, great for emergency situations.
8. The power outlet connections of the Diamond GoBox can provide 12V/80W power and can be used to power portable accessories such as your spotlight, air compressor, DVD player, radio and it can even charge your cell phone, tablet and other mobile devices!
